PROFESSIONAL SUMMARY

Full Stack Engineer with 5+ years of experience building and maintaining web applications using Laravel, PHP, MySQL, and JavaScript. Experienced in developing end-to-end features across frontend, backend, and database layers, with hands-on experience in multi-role systems, third-party integrations, debugging, system optimization, and production support.

WORK EXPERIENCE

KEYPOINT LEARNING — Freelance (International Client) **June 2026 – Present**

Full Stack Laravel Engineer

- Developed and enhanced features for a Laravel-based online education platform across frontend, backend, and database layers.
- Implemented UI, design, and styling improvements using Blade, HTML, CSS, and JavaScript based on client requirements.
- Developed backend functionality and database changes using Laravel, PHP, controllers, models, migrations, seeders, and application queries.
- Implemented and maintained platform integrations and features, including Mailcoach, Stripe-related functionality, dashboards, affiliate tools, curriculum, and program/session management.
- Investigated and resolved application issues through debugging and testing while collaborating directly with the client on requirements, priorities, and feature delivery.

PINNACLE TECHNOLOGIES INC **September 2022 – May 2026**

Software Engineer

- Developed and maintained web applications using Laravel and PHP, supporting multi-role systems for administrators, students, cashiers, accounting staff, and applicants.
- Developed front-end functionality using HTML, CSS, and JavaScript, creating user-friendly interfaces tailored to the needs of diverse user roles.
- Designed and maintained efficient database structures using MySQL and SQLYog, ensuring effective data management across multiple access levels.
- Developed scalable backend functionalities following best practices to improve application performance and maintainability, while identifying and resolving issues to ensure stable system performance and an optimal user experience.

BERNABEST FOODHOUSE CORPORATION / REMATE (Client Projects) **January 2021 - January 2022**

Full Stack Engineer / Developer

- Developed Inventory Management and Cash Management systems to streamline business operations and improve financial tracking, while enhancing corporate systems covering POS, HR, Franchise, Logistics, and Reporting modules.
- Developed and deployed a custom Content Management System (CMS) for a local news media outlet, including an admin dashboard for managing articles, categories, and users.
- Built a Laravel-based news publishing platform with role-based access control (RBAC) for administrators and bloggers, along with a public-facing portal for readers.
- Implemented real-time content updates and streamlined publishing workflows to improve operational efficiency and user engagement, while developing scalable backend functionality following best practices for improved system performance and maintainability.
