PROFESSIONAL SUMMARY

Full Stack Engineer with 5+ years of experience building production web applications using Laravel, PHP, MySQL, JavaScript, and REST APIs. Hands-on experience with React, TypeScript, Inertia.js, Tailwind CSS, and Vite. Experienced in integrations, dashboards, multi-role systems, database-driven applications, debugging, and production support.

WORK EXPERIENCE

KEYPOINT LEARNING - International Client **June 2026 – Present**

Independent Full Stack Laravel Engineer

- Developed and enhanced features for a Laravel-based online education platform based on client requirements and assigned development tasks.
- Developed backend functionality using Laravel/PHP, including controllers, models, migrations, seeders, queries, and application logic.
- Implemented UI improvements and platform integrations including Mailcoach, Stripe-related functionality, dashboards, affiliate tools, curriculum, and program/session management.
- Investigated and resolved application issues through debugging and testing while collaborating directly with an international client on requirements and feature delivery.

PINNACLE TECHNOLOGIES INC **September 2022 – May 2026**

Software Engineer

- Developed and maintained production web applications using Laravel/PHP for administrators, students, cashiers, accounting staff, and applicants.
- Developed frontend functionality using HTML, CSS, and JavaScript and designed database structures using MySQL and SQLYog.
- Developed maintainable backend functionality while troubleshooting issues and improving application performance, reliability, and user experience.

BERNABEST FOODHOUSE CORPORATION / REMATE (Client Projects) **January 2021 - January 2022**

Full Stack Engineer / Developer

- Developed Inventory Management and Cash Management systems and enhanced POS, HR, Franchise, Logistics, and Reporting modules.
- Developed and deployed custom CMS and Laravel-based publishing platforms with dashboards and role-based access control.
- Implemented content workflows and scalable backend functionality to improve operational efficiency and system maintainability.

PROJECTS

LIRA **August 2026 – Present**

Full Stack Developer

- Building an artist/creative portfolio platform using Laravel, React, TypeScript, Inertia.js, Tailwind CSS, Vite, and MySQL.
- Developing responsive React/TypeScript interfaces, configurable portfolio settings, media uploads, navigation, gallery, music, artwork, and project presentation features.
- Implementing Laravel models, migrations, database logic, and using Git/GitHub for source control.

EDUCATION

Our Lady of Fatima University – Antipolo

Bachelor of Science in Information Technology **June 2022**
